Sample

Is social group membership, social connectedness and hope associated with mental health during the COVID-19 pandemic?

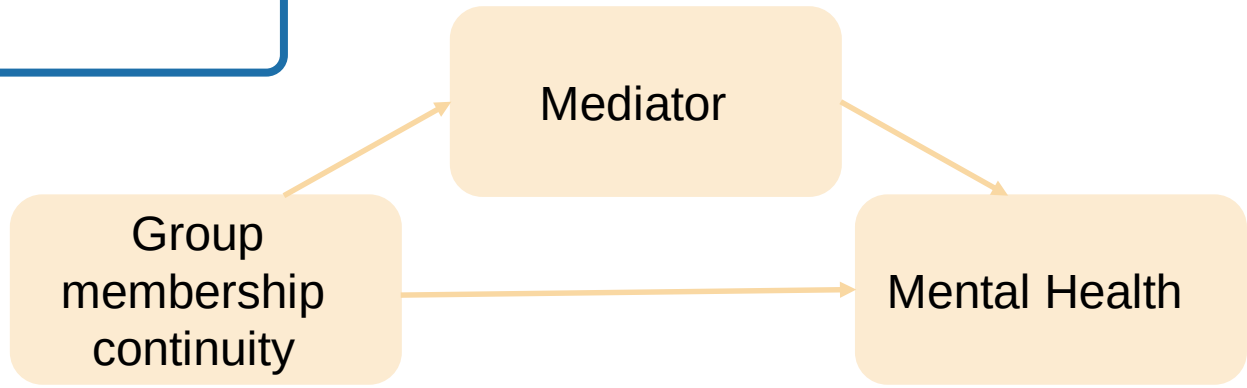
Significant correlations:

Prior multiple group memberships — Group membership continuity

Group membership continuity — Lower scores:
- Depression
- Anxiety
- Psychosis-like experiences

Feeling connected to others:
- In-person
- Online

Hope



Significant correlations:

Prior multiple group memberships — Group membership continuity

Group membership continuity — Lower scores:

NEET young people's experiences of the COVID -19 pandemic…

… on-going data collection & future directions
